

COSTELLO STAINLESS

David Costello and Steve Makinson in the reception of the Company's prestigious new premises in Sowerby Bridge

As announced in September, David Costello Materials has been acquired by near neighbours Abram Pulman Steel. Following a brief period of familiarisation, the company has made the short, three mile trip to Sowerby Bridge and relocated its stock and office facilities within Abram Pulman's impressive premises.

The two organisations have amalgamated together extremely quickly and efficiently without any disruption to services.

The entire workforce and management teams of both companies have reacted very positively in recognition of the exciting opportunities and challenges that lie ahead.

As you can see from the pictures, the new Walton Street home is very different from the old premises in Ripponden. The office accommodation is spacious, light and very modern and provides the ideal working environment.

New storage facilities for stainless have been purpose built to ensure that stock is both accessible and easily maintained.

The Company is justifiably proud of its new location and will be delighted to show you around and introduce you to our new colleagues, some of whom like Steve Makinson you may already have spoken to.

If you wish you can arrange a visit to see for yourselves the improved facilities at the new premises by ringing either David or Julia Costello on 01422 317525.

Details of our new name, address, telephone and fax numbers and how to find us are shown overleaf.

Spacious, light and modern - the ideal working environment
